

This filter cartridge features a high flow capability at a lower overall operating cost. Lower initial pressure drops and high contaminant removal.

### FEATURES AND BENEFITS

- Pleated design for more surface area
- FDA approved materials—NSF 61 certified
- Engineered media for superior performance
- Cleanable and reusable in most applications and micron sizes
- Thermally bonded end caps to ensure better sealing

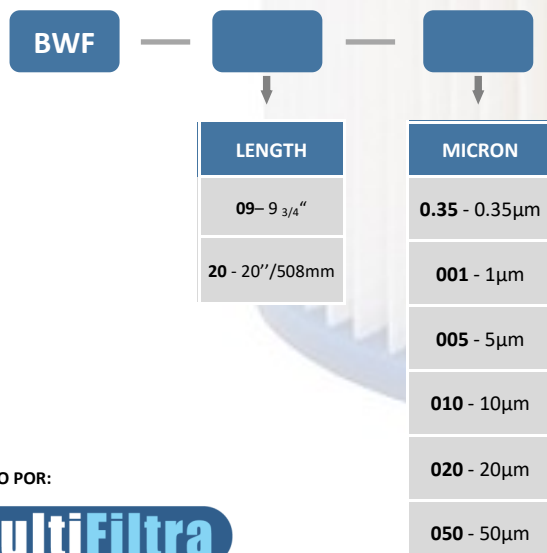

### APPLICATIONS

Reverse Osmosis pre-filtration, drinking water filtration, desalination pre-filtration, industrial water filtration, cooling tower filtration, chill water loop filtration, food and beverage filtration, marine/aquatic filtration

### OPERATING CONDITIONS

Filter media	Polyester-Plus™, Synthetic Fiber
Maximum working temperature	Up to 60°C / 140°F
Maximum Flow rate	12 GMP for 12sq. ft. media
	26 GMP for 26 sq. ft. media
Outside diameter	2 3/4"
